

Cover All You Need for Opening

Access Tank Cover - Type C, Type O, Type R

Application

The Type C, Type O and Type R stainless steel manhole covers are used on tanks or containers including bottling and washing machines. The products are suited for a wide range of sanitary applications such as wine, other beverages, dairy and foodstuffs. They are designed to fit where a closeable mean of access to the interior of the vessel, situated above or below the liquid level, is required. To fit various requests the cover comes in oval, circular and rectangular shape.

Working principle

Open the cover by loosening the handle. This range includes covers with various openings. For inspection purposes there are covers with inwards opening. If it is necessary to physically enter the tank there are covers with outwards and/or side-swung openings.

Materials

	Type C, Type O, Type R
Steel parts	1.4301 (AISI 304) or 1.4404 (AISI 316L)
Plastic parts	Nylon
Seal	EPDM
Cover finish	Polished
Frame finish	Raw (B2)

Installation

In order to obtain a perfect seal and correct function, it is essential that the frame is welded carefully and correctly. After welding always control that the sealing is in full contact with the sealing surface.

Access tank covers, types C, O and R.

Options

- A. Relief valves are available separately - cannot be ordered mounted on the cover (please see ordering leaflet).
- B. Seal of Natural rubber.
- C. Seal of NBR.

Ordering

Please state the following when ordering:

- Type.
- Frame height.
- Materials.

Above Liquid Level

Circular	Oval	Rectangular	Type	Alfa Laval Seal name	Glued	Function	Pressure Range* (bar)/(psi)	Relief Valve (option)
